# Frontend and Backend

Frontend:
- Things users can see
- The visible part of a website or application
- Task of a frontend-developers: programming the content
- languages used: HTML, CSS, JS

Backend:
- Things users can´t see
- The unvisible part of a website or application
- Task of a backend-developers: Processing and management of the data from the frontend
- languages used: All other languages (Java, PHP, C++)

Communication between frontend and backend:
